

FORESTRY QUALITY OPPORTUNITIES

Mechanical Engineers

To our R&D department we are looking for a Mechanical Engineer, Chassis and a Mechanical Engineer, Operator Environment, referencenumber1204 and referencenumber 1205.

As a designer, you are involved in the development process from concept design to finished product, as well as active in monitoring in the field of collection and compilation of data to drive the area's future development. You will work with, welded steel structures and machined parts. A natural part of the job is to work with suppliers and customers to find effective design solutions.

You are a machine designer with the right sense for the machines. Most likely, you are civil or Bachelor of Science with several years experience in construction work. In addition to general mechanical engineering knowledge and experience we value the experience of forestry technology, mobile hydraulics and weld fatigue vulnerable structures. We use Catia V5/ Smart Team in our development and Automation Studio for hydraulic structures.

We are looking for someone who is committed and eager to work in a creative environment with a strong commitment to quality and continuous development. Initiative and good interpersonal skills are things we value and good knowledge in English and a B license.

As a Mechanical Engineer ,Operator Environment, we value knowledge of vibration, acoustics, ergonomics and design. Further information, please contact Bengt-Arne Walldén 090-709551, e-mail: bengt-arne.wallden@komastuforest.com

Please submit your application as soon as possible no later than **2012-04-15** to humanresources@komastuforest.com

Note the reference number for the job you are applying, 1204 and/or 1205.
