

KOMATSU**Genuine Parts****Uptime Kit**

The right parts close at hand keeps your machine up and running

The nearest workshop or spare parts depot in the forest is often far away. To make things easier, Komatsu Forest offers an Uptime Kit that gathers a carefully chosen selection of critical components. This gives you peace of mind knowing that these essential components are close at hand to minimise downtime and keep your machine up and running.

Uptime Kit

Our spare parts specialists have chosen the components included in the Uptime Kit by analysing Komatsu parts sales. Each Uptime Kit includes everything relevant to your

machine or head. Stocking these components yourself enables you to avoid the time and expense of unscheduled trips to the nearest workshop or spare parts depot.

Highlights

- Carefully chosen components – operation-critical as well as practical – to help keep your machine up and running
- Sold in a sturdy metal storage box
- Each Uptime Kit includes a 5% discount on the contents and even the box itself is included in the price
- The box includes a list of its contents, providing you with a clear idea of what's in the box, but also making it easier to order replacements
- All components are top sellers at our workshops and are also easy for you to replace in the field yourself
- Designed for machines and heads manufactured from 1 June 2022 onwards
- Available as an option on new machines/heads or for purchase from our workshops for your existing machine or head

Uptime Kits are available for:

- Harvesters
- Forwarders
- Heads: C93, C124, C144, C164, S82, S92, S132, S172, S162E
